DETAILED ACTION

Election/Restrictions

1. Applicant's election of species 2 of Group I in Paper No. 6 is acknowledged.

However, upon further consideration, it is found that further restriction requirement is needed. Any inconvenience caused by this action is regretted.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-55 and 87-105 drawn to a volume hologram, classified in class 359, subclass 29.

II. Claims 56-86, drawn to a method of making a hologram classified in class 430, subclass 1, 2.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by a materially different process such as electrically switchable holographic processes or Bragg angle holography.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art, Unit: 2872

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

If the Applicant elects I, then a species as identified below must be elected also. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1 – volume hologram producing 2nd spatial wavefront and a 2nd optical spectrum – claims 1-11, 26-33, 36-44

Species 2 – volume hologram producing 2nd spatial wavefront and a 2nd temporal waveform – claims 12-25, 34, 35, 45-55

Species 3 – apparatus comprising a feedback structure - claims 87-103

Species 4 – a volume hologram configured to map 1st spatial wavefront into 2nd spatial wavefront and to map 1st optical spectrum into 2nd optical spectrum – claims 104-105

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

If the Applicant elects II, then a species as identified below must be elected also. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1 – superposition of temporal interference patterns – 56, 57

Species 2 – depositing and imprinting a hologram on the layer – claims 58-81

Species 3 – selectively exposing a photosensitive substrate– claims 82-86

Art. Unit: 2872

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Kerry Tweet on 30 December 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art. Unit: 2872

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alessandro V. Amari whose telephone number is (703) 306-0533. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cassandra Spyrou can be reached on (703) 308-1687. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9318 for regular communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
